### **Yesterday**

Anatech's founder, H Don Wilkat received his initial formal education in Aircraft Electronics and Electronics Engineering through the Southern Alberta Institute of Technology in the early 80's. He received his Certified Engineering Technologist certification from ASET in 1994.

Anatech was founded Feb 1993 for two main reasons. One, to provide technical and management services to mobile communications service shops in prime growth and expansion phases. And secondly, to provide end-users that needed more flexible service availability on a more personal level.

The past 29+ years in technician and service manager roles, working with almost every make, model and accessory of radio, phone and data equipment has given Don a wealth of experience and knowledge that has become indispensable in this industry.

### **Today and Tomorrow**

Anatech specializes in communications equipment including; two-way radio, cellular, data, in-vehicle hands free and booster kits, GPS vehicle tracking, and various specialty products. Anatech also specializes and is a leader in custom in-building signal enhancement solutions.

Anatech is Calgary and southern Alberta's leading Vertex two-way radio dealer and also offers service and repairs to Motorola and Kenwood two-way radio product, and many other related mobile communications products.

### **our Business Ethic**

honesty, integrity, punctuality

Thank you for considering Anatech.
