Yesterday

Anatech's founder, H Don Wilkat received his initial formal education in Aircraft Electronics and Electronics Engineering through the Southern Alberta Institute of Technology in the early 80's. He received his Certified Engineering Technologist certification from ASET in 1994. It was also in this time he received his (Business Development Bank) Small Business Management diploma.

Anatech was founded Feb 1993 for two main reasons. One, to provide technical and management services to mobile communications service shops in prime growth and expansion phases. And secondly, to provide end-users that needed more flexible service availability on a more personal level.

The past 31+ years in technician, service manager, and business owner roles, has given Don a wealth of experience and knowledge that has become indispensable in this industry.

Today and Tomorrow

Anatech's specialization has made it a leader in two-way radio communication systems and custom cellular in-building signal enhancement solutions.

Whether your communications needs are a few basic analogue radios or a complex digital repeater system, Anatech can help provide and support your best-fit solution.

And if it's better indoor cellular coverage you need, Anatech is the only Calgary-based cellular in-building booster provider that offers full, in-house, end-to-end solutions entailing; site/building analysis, 3D terrain coverage analysis, system design, installation, service, and a full 1-year performance and network guarantee.

our Business Ethic

honesty, integrity, punctuality

Thank you for considering Anatech.
