Spotwave

in-building signal enhancement solutions

Spotwave's carrier-approved indoor coverage solutions seamlessly bring the outdoor signal inside – ensuring your wireless devices work reliably indoors where they are used more often.

Indoor Wireless Coverage Benefits

- Mobilize your workforce with new wireless data applications that work indoors
- Optimize your resources so your customers can reach your sales and support teams even when they're away from their desks
- Ensure security and safety for your employees and visitors in areas like stairwells and parking garages

The SpotCell family of indoor coverage systems is the solution of choice for carriers and their customers requiring reliable, "always-on" indoor wireless connectivity. SpotCell systems provide targeted coverage for spaces ranging from 2,500 up to 100,000 square feet.

SpotCell products are carrier-specific, easily deployed, cost-effective coverage solutions for all technologies. Once installed, a SpotCell system requires no maintenance or adjustments and is guaranteed to protect signal integrity under changing conditions.

Spotwave Product Benefits

- Cost-effective targeted coverage only where you need it
- Everything you need for rapid deployment in an out-of-the-box solution
- Modular so you can buy what you need now, and scale it later as required
- Easy to install - no special skills or equipment required
- Our systems support AMPS, CDMA, GSM, TDMA, GPRS, 1XRTT, EVDO, and UMTS technologies

Powered by SpotCell Technology

- Spotwave systems are the most intelligent coverage systems in the world, enabling them to adapt real-time to changing network conditions
- Unlike traditional systems our systems are easy to install and require no RF-engineering services
- Spotwave's built-in AutoTrac LEDs guide proper alignment to the base station
- Our systems are designed to provide consistent coverage area and optimum performance
- Once installed it's maintenance free - just set it and then forget it
- Guaranteed to protect carrier signal integrity as the network evolves
