Yesterday

Anatech's founder and owner, H Don Wilkat received his initial formal education in Aircraft Electronics and Electronics Engineering through the Southern Alberta Institute of Technology. He received his Certified Engineering Technologist certification in 1994. It was also in this time he received his FBDBC Small Business Management diploma.

Anatech was founded Feb 1993 for two main reasons. One, to provide technical and management services to mobile communications service shops in prime growth and expansion phases. And secondly, to provide end-users that needed more flexible service availability on a more personal level.

The past 22+ years in technician and service manager roles, working with almost every make, model and accessory of radio, phone and data equipment has given Don a wealth of experience and knowledge that has become indispensable in this industry.

Today and Tomorrow

Anatech now provides a total commitment to the servicing and sales of mobile communications equipment including;

- two-way radio (mobile, portable, site)
- cellular & Mike
- data (mobile computing, point to point)
- in-vehicle hands free and booster kits
- GPS (vehicle tracking)
- in-building signal enhancement solutions
- and various specialty products

Anatech also offers service and repairs to

- Vertex two-way radio (& accessories)
- Kenwood two-way radio (& accessories)
- Motorola two-way radio (& accessories)
- Motorola cellular & Mike
- Nokia cellular
- and other related mobile communications products
