

ANATECH

portable two-way radios & accessories

wide-area radio coverage

facility city provincial national

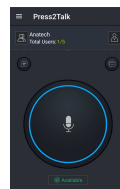

Introducing our wi-fi/cellular enabled radios

Use wi-fi mode for total coverage within any size building complex. Use cellular mode for extended wide-area city, provincial, or national coverage.

Both wi-fi and cellular modes utilize remote server capabilities and require a monthly service fee.

Cellular mode use requires an appropriate cellular data plan on a preferred carrier as well.

There are also android & iphone app options for added flexibility and user integration.

the industry's smallest mobile radio with a (standard) DIN size of 6" wide, 1.75" high, 3.25" deep
